CCCAPPLY NONCREDIT APPLICATION: A SIMPLER PATH TO ENRICHMENT

A shorter, more streamlined, mobile-friendly process for students enrolling exclusively in noncredit courses at California community colleges is now available.

The new CCCApply Noncredit Application does not contain citizenship, residency, or military status questions. That reduces time to apply by half compared to the Standard Application, which takes less than 15 minutes to complete on average.

Designed to leverage the existing technical infrastructure of the CCCApply Standard Application, the Noncredit Application is an optional workflow with a distinctly separate URL. The majority of the admin configuration, implementation, and data downloads is already setup within the existing CCCApply Standard Application configuration.

Why Noncredit?

Existing California education code requires residency determination for every student at the time of admission to a California community college. However, the recently passed Assembly Bill 3101 exempts students seeking to enroll exclusively in career development, college preparation, and other noncredit courses from residency classification requirements.

Key Benefits for Students

- Shorter, more streamlined version of the Standard Application workflow
- Does not ask questions related to residency, citizenship, or military status
- Noncredit students may reapply for credit courses using the Standard Application for the same term, same college
- CCCApply auto-population feature makes reapplying for credit courses easier and faster

Key Benefits for Colleges

- Unique URL customized for each college
- Same admin configuration, reporting tools, and downloads process as the Standard Application
- Option to display Majors/Programs of Study and supplemental questions that are different from the Standard Application
- Option to display or hide Needs and Interests questions

CCCAPPLY INTERNATIONAL APPLICATION

California community colleges welcome qualified international students to their academic, vocational, and technical programs. International students enrich the academic environment for all students.

The CCCApply International Application provides international students a complete application to a particular California community college. The online form can be accessed from the college's portal or website, or from **CCCApply.org**. Along with the International Application, many colleges also request the following:

- **Certification of finances**
- **Proof of English competency**

Key Benefits for Students

- Completely online process
- Streamlined application specifically for international students
- Auto-populates form data from the applicant's OpenCCC account
- Provides links to financial aid applications and other opportunities based on application information provided

CALIFORNIA COLLEGE PROMISE GRANT APPLICATION

Helping to make higher education more affordable, the California College Promise Grant (formerly known as the BOG Fee Waiver) waives enrollment fees for nearly half of students attending California community colleges.

The California College Promise Grant application is offered as a supplement to CCCApply, providing a secure, online, systemwide solution for determining fee waiver eligibility. The application is fully funded by the CCC Chancellor's Office and governed by the CCCApply Advisory Committee, ensuring continuous compliance with state education codes.

 **All applications offer full Spanish translation and mobile-friendly interface.**

Key Benefits for Colleges

- Easy migration of admin configuration from the Standard Application
- Colleges choose business rules and supplemental questions that can be easily migrated from the Standard Application, and templates are also available to expedite this process
- Colleges control configuration of terms, majors, and English proficiency requirements
- Automatically determines admission eligibility
- Easy integration with CCC MyPath for customized matriculation
- Easily generate reports through the CCC Report Center
- Validation logic prevents conflicting responses and flags situations colleges might want to investigate
- Collect additional required information using Document Gathering feature of CCC MyPath

Key Benefits

- College branded with logo and unique URL
- Same efficient, streamlined interface as the CCCApply Standard Application
- OpenCCC integration allows students to use one ID across applications and simplifies college data reporting
- Displays only relevant questions based on previous answers and OpenCCC student account data
- Quickly determines dependency status, then displays the appropriate eligibility and income questions
- Calculates preliminary waiver eligibility status
- Provides security safeguards, a review application page, and superior support services through 24/7 CCCHelp.info
- Rules with HTML email messages
